

Facility name:	Panovi DOOEL
Region / Country:	MK
STeP certificate number:	22002062
Institute:	TBD

Period of calculation : 01.01.2025 - 31.12.2025

based on self-declared data & input values

Carbon Footprint

Includes impacts (carbon footprint) created directly at the facility (gate-to-gate) and impacts generated by the production of raw materials and by the process steps which took place in another site (cradle-to-gate).

Gate-to-gate, on site

Per yearly production

49.641,49

kg CO²-eq.

Per 1 kg of material output

0,26

kg CO²-eq.

Cradle-to-gate

Per 1 kg of material output

32,34

kg CO²-eq.

Contribution analysis, on site

Facility operations	kg world-eq.	Percentage %
electricity	0,23 kg	88,26 %
fuel	0,00 kg	0,00 %
water	<0,01 kg	0,27 %
chemicals	0,00 kg	0,00 %
packaging	0,02 kg	9,45 %
waste packaging	0,00 kg	0,00 %
waste yarn & textile	0,00 kg	0,00 %
building hall	<0,01 kg	2,02 %

Water Footprint

Includes impacts (water footprint) created directly at the facility (gate-to-gate) and impacts generated by the production of raw materials and by the process steps which took place in another site (cradle-to-gate).

Gate-to-gate, on site

Per yearly production

66.952,38

m³ world-eq.

Per 1 kg of material output

0,35

m³ world-eq.

Cradle-to-gate

Per 1 kg of material output

4,98

m³ world-eq.

Contribution analysis, on site

Facility operations	m ³ world-eq.	Percentage %
electricity	0,33 m ³	95,03 %
fuel	0,00 m ³	0,00 %
water	<0,01 m ³	0,12 %
chemicals	0,00 m ³	0,00 %
packaging	0,02 m ³	4,42 %
waste packaging	0,00 m ³	0,00 %
waste yarn & textile	0,00 m ³	0,00 %
building hall	<0,01 m ³	0,42 %

Gate-to-gate, on site

Includes impacts created directly at the facility. This value does not include impacts from the raw materials entering the facility and processes which took place in another site.

Cradle-to-gate

Includes impacts created directly at the facility and impacts generated by the production of raw materials and by the upstream process steps which took place in another site.

Trust the science

Our methodology is based on IPCC and global standards for carbon and water footprints. It has been reviewed and verified by third party experts!
